Please take a little time

to read the following important care notes.

Care of your sign

Brushmark Signs are hand painted, as with all painted surfaces, care should be taken to avoid damage. Gently wipe clean using a clean soft damp cloth and clean lukewarm water. Do not use sprays, power washers, chemicals, solvents or abrasive cleaners etc.

Position of the sign

It is the responsibility of the client/customer to ensure that the sign is positioned away from areas where accidental damage may occur due to cleaning, over spray of chemicals, cleaning solutions, heat sources or other activity nearby that may cause surface damage.

Brackets & fittings

All sizes quoted are approximate. As wood is a natural product some small changes in dimensions may occur during the production and painting process. For this reason the client/customer is advised to wait until they are in possession of the finished sign prior to the manufacture of any custom brackets/installations to ensure accurate fitting.

Ensure installers are aware of the above information *before* your sign is installed.
